

Stanford
AA 203: Optimal and Learning-based Control
Grading Policy

1. Homework are assigned on Wednesday and due the next Wednesday on Gradescope. If you have not done it yet, please sign up on Gradescope by entry code MZYRVW.
2. For each problem set, a team of 10-13 students, led by Jonathan, will be in charge of grading. Every Wednesday, after class, the team in charge of grading will meet with Jonathan for approximately 30 minutes to discuss grading details.
3. Each student will grade homework **only once** during the quarter.
4. Students can not submit late homework during their grading week.
5. Each student has to let Jonathan know about her/his preference for the grading week **by Monday, April 8th** (an online form will be provided). The assignments for the grading weeks will be posted on the course website. Preferences are on a first come/first served basis; if a grading week is unavailable, the student will be assigned to the closest available grading week.
6. The grading should be completed by the Tuesday afternoon after the homework are handed in, so we can record the grades by Wednesday.
7. A 5% of student's final grade will depend on the quality and promptness of student's work on problem set grading.
